

The settlement approach

-where boundaries and action merge

Discussing potential applications for CCCM practitioners

6 November 2020

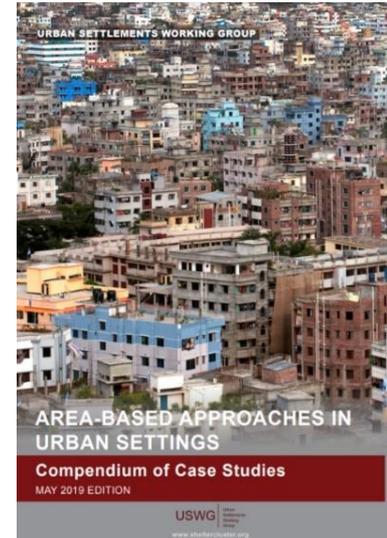

The Urban Settlement Working Group

A platform for humanitarian agencies from all sectors to exchange about area-based, settlement-based and urban practices

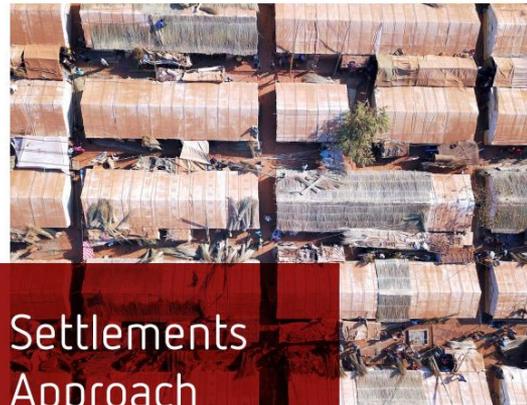

Housed by the Shelter Cluster and accessible to all

Documenting best practices, ground-level successes, and providing technical guidance and knowledge on settlements-based approaches

What is the settlement approach?

The settlements approach is a framework for aid agencies and local actors to work together at the local level to plan and deliver more efficient, targeted, and localized multisectoral interventions in human settlements affected by a crisis.

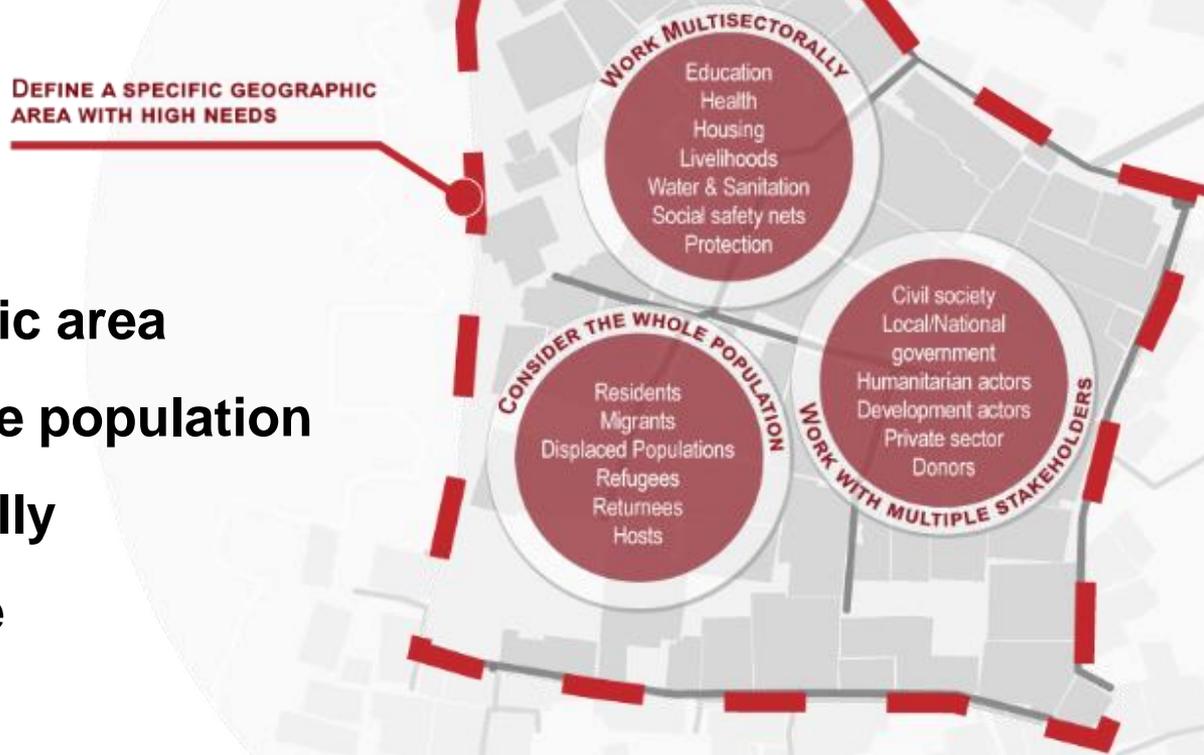

Settlements
Approach
Guidance Note

DEFINE A SPECIFIC GEOGRAPHIC
AREA WITH HIGH NEEDS

1. Defines a geographic area
2. Considers the whole population
3. Works multisectorally
4. Works with multiple stakeholders

What is a human settlement?

‘The place where people live as a socially-defined and spatially-bound unit, which reflects the interaction of dynamic social, cultural, economic, political and environmental features in space and time’

Why use a settlements approach?

1. Calls for a more integrated approach to humanitarian response
2. Increased complexity of humanitarian crises
3. Recognition of the importance of local leadership

When is it most appropriate?

- Crisis affected populations locally comprise different groups (e.g. Displaced and host communities)
- The humanitarian coordination architecture does not penetrate to the settlement level
- The population has complex and interdependent needs

- Local authorities are present, credible, willing to partner
- A local multisectoral coordination group or platform exists
- Humanitarian and development stakeholders are committed to supporting resilience.

Settlements
Approach
Guidance Note

The image shows an aerial view of a settlement with numerous small, rectangular structures, many of which have roofs made of corrugated metal or similar material. A dark red rectangular overlay covers the bottom left portion of the image, containing the title text in white.

An update from the ongoing process

+/- 60 pages of principled and technical guidance for humanitarian practitioners of all sectors

Informed by field-level consultations and online debates in series of webinars

With contribution from **15 authors and 15 peer reviewers** : experienced experts and senior staff from lead agencies (NGOs and UN)

With support from a professional language editor

Table of content

- 1. Introduction to the settlements approach**
- 2. Characteristics of the settlements approach**
- 3. Implementing the settlements approach**

Chapter 1 – Introduction to the settlements approach

- 1.1 What is the settlements approach?**
- 1.2 Why use the settlements approach?**
- 1.3 Key benefits of the settlements approach**
- 1.4 When is the settlements approach appropriate?**
- 1.5 How does the settlements approach complement existing approaches?**

Chapter 2 – Characteristics of the settlements approach

- 2.1 It recognizes that a settlement is defined by both physical and socio-cultural factors**
- 2.2 It relies on multisectoral engagement and input**
- 2.3 It involves working with multiple stakeholders**
- 2.4. It considers the needs of the whole population**

Chapter 3 – Implementing the settlements approach

- 3.1 Identifying and delineating target settlements**
- 3.2 Applying the settlements approach to context analysis and needs assessment**
- 3.3 Applying the settlements approach to strategic response planning**
- 3.4 Applying the settlements approach to collaborative implementation and monitoring**

Next steps...

Finalisation: end of november

Dissemination: december

Virtual training workshop: december

Discussion on potential applications for CCCM

- **How would like to use this approach in your CCCM work?**
- Questions and reactions from participants

**THANK YOU FOR
YOUR ATTENTION**
