**Urgent needs ranged from non-food items (NFI) and tents to food and infrastructure repairs. As a result of these incidents, many IDPs lost NFIs, furniture and personal belongings.**

### Response:

- 102 Fire points were established in 83 IDP sites.
- 831 number of community volunteers trained.
- Awareness raising on fire mitigation conducted for 50,000 individuals.
- In coordination with other clusters, CCCM organize the response to the affected sites to avoid any duplications.
- 121,545 individuals benefited from fire mitigation and prevention activities that involve distributing fire extinguishing and first aid kits reaching.

### Challenges and Constraints:

- 97 IDP sites received appropriate and timely support.
- Only 30% of the sites affected by fires were equipped with fire extinguishers.
- Delayed response to incidences reported; tent replacements, NFI support and health needs etc.
- Over crowding in majority IDP sites/RC impacted by earthquake.
- Only 20% of IDPs sites in NWS equipped with fire mitigation measures, and almost one million IDPs under the fire incidents risk.
