Site Management- National Cluster

9 July 2024

Agenda:

- ◙ National Cluster updates/Follow-up on previous action points
- ◙ Sinjar/Sennar situation update
- ◙ Additional points for discussion
- ○ Guiding principle/Minimum Action package- for review
- ○ Request updating the PSEA Network contact list.
- ○ Cluster Reporting
- ○ SAG
- ○ Capacity-development
- ○ CCPM results.

Follow-up on previous action points

- Reporting-Cluster to share two templates- 5Ws and Narrative template- June 27. - DONE

- Reporting- Site management partners to share inputs with the Cluster- 5 July/ every fifth of the month.- IN-PROGRESS

- Intention surveys- Feedback on the UNHCR support for the Kordofans and the Darfurs- CLOSED

- Intention surveys- Cluster and REACH to present the plan+ tool to the partners once locations and capacities are determined- IN-PROGRESS

- Flood preventions key messeging- Cluster to work with AAP/ Flood Task Force- IN-PROGRESS

Brief National Updates
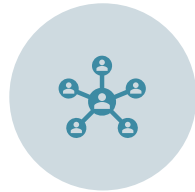

Intro- Cluster Co-Coordinator- Shadman Namiq (NRC)

Population updates- Secondary data

Site Management Partner Presence

Review of the common position paper on relocation and alternative to shelters

Guiding principles and minimum action package

Secondary sources data / IOM DTM-Updates 03

	Households	Individuals	Percentages	
Total Population	2,117,761	10,540,215.0	In sites and site-like seetings	
Camps	495,207	2,476,035.0	23%	
Schools/other public buildings	184,933	924,665.0	9%	
Open Area/ informal settlements	219,983	1,099,915.0	10%	
Improved/ critical shelters	27,167	135,835.0	1%	
Rented Accomodation	115,169	575,845.0	5%	
Host families	1,075,302	5,376,510.0	51%	
			44%	4.6M people

Sinjar/Sennar updates

Key updates

- More than 130,000 people have fled Sinjar, Sennar state, since June 24 as the armed conflict has spread across into the Sennar State (OCHA).

- Displaced people have sought refuge in different states, like Gedaref, Kassala, Blue Nile, White Nile, and the Red Sea (Port Sudan). (Authorities and Partners)

- Local authorities in Gedaref State estimate some 26,000 have recently arrived. In the Blue Nile State, the Sudanese Humanitarian Aid Commission (HAC) estimates some 30,000, while in Kassala, White Nile and Red Sea State, local authorities and partners report some 5,000, 3,900 and 500 respectively.

- Cluster has had an ad hoc call with partners- a flash note on the response will be shared in the course of the day

- Reception centres being established (3) in Gedaref, (2) in Kassala.

- Sites / site-like settings becoming unavoidable- alternative options limited

Partner presence Map
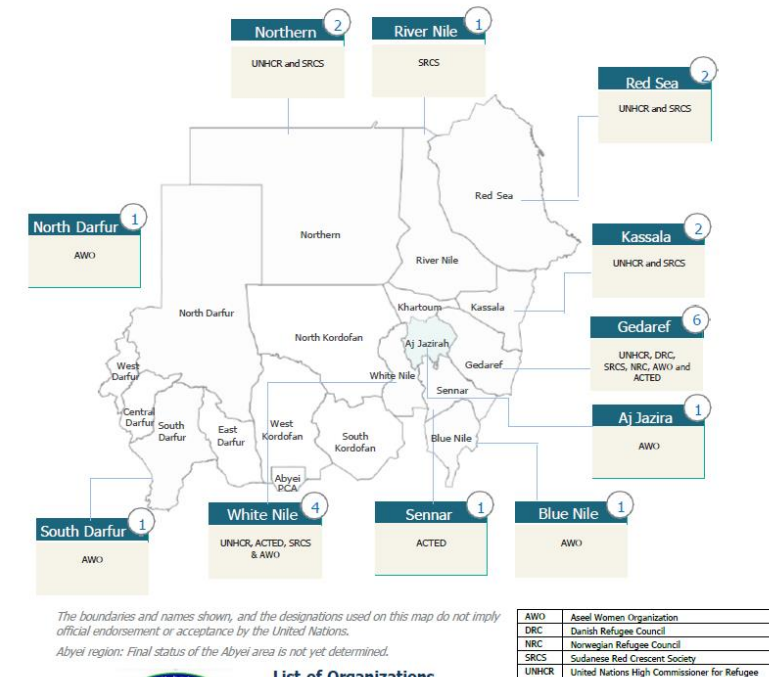

Additional Points- for discussions/ review

Guiding principles and minimum action/ package-feedback cob Thurs.

Cluster Reporting Templates- every fifth of the Month

SAG ToRs- Call of Expressions to follow (Tbd)

CCPM results + CSP- Next Cluster Agenda

Templates

Draft-1.0 JUNE 2024

Guiding Principles - Minimum Actions- Site Management

1. **Cluster Strategic objectives:**
   - The Cluster has developed its 2024 strategy within four main priority objectives:
     - Enhancing overall coordination and assistance monitoring: This involves ensuring that all activities are well-coordinated and that the assistance provided is monitored for effectiveness and efficiency.
     - Community engagement & participation: It is crucial to involve the community in decision-making processes and ensure their active participation in the management of the sites.
     - Capacity-sharing initiatives to facilitate self-management of sites and site-like settings: This involves building the capacity of the community to manage their own sites, thereby promoting self-reliance and sustainability.
     - Enhancing site protective environment through small-scale site improvements: This involves making small-scale improvements to the sites to ensure a safe and dignified living condition for the IDPs.

2. **Guiding principles:**
   - Context: More than 10.5 million IDPs are displaced in Sudan, according to the IOM DTM Mobility Update-June 2024.
   - Cluster estimates that 44 percent of the displaced live in sites and site-like settings, including camps, schools/public buildings, informal settlements, and/or improvised shelters.
   - The current funding constraints and capacity limitations faced by partners require prioritization in the CCCM[1] programming to ensure the limited resources are maximized while addressing the most in need and pressing issues in sites and site-like settings.
   - Response to the needs is context (state-based) and hence requires contextualization accordingly while ensuring practical minimum standards are applied and with protection centrality.
   - Government counterparts and the host community are primarily the first responders; hence, partner agencies need to ensure adequate consultation with all stakeholders involved.
   - In light of these, the Cluster recommends partners to consider the following key principles- not exhaustive:

Draft v1.0

BACKGROUND AND CONTEXT

More than 8.8 million people fled their homes since fighting erupted between the Sudanese Armed Forces (SAF) and the Rapid Support Forces (RSF) in mid-April 2023. An estimated 6.8 million people are displaced within the country and have taken refuge in 7,251 locations of which a projected twenty-five per cent live in sites and site-like settings i.e., camps, collective centers (communal /public building including in schools) and temporal informal settlements. The Site Management Cluster was activated in July 2023 to address the growing needs of the forcibly displaced people hosted in sites, and site-like settings.

The Cluster is led by UNHCR and co- coordinated by the Norwegian Refugee Council (NRC) at the national level. The Cluster has also put in place sub-national coordination mechanism in 5 states, i.e., in Gedaref, Kassala, Northern, Red Sea, and White Nile states. Plans are under-away to expand and/or align the Cluster sub-national mechanisms with that of the ongoing Sudan operation coordination review led by OCHA. Co-coordination at the sub-national level with I/National NGOs is being sought with the White Nile state already having UNHCR as the lead and co- coordinated by the Sudanese Red Crescent Society (SRCS). The rest of the existing sub-national coordination is primarily supported by UNHCR -CLA through delegated Focal Points. More than 20 partners are registered with the Cluster however only a handful 10 are actively reporting site management programming at the respective areas of coverage. Cluster partners outreach is expected to expand with a coverage of 11 states in May reported up from 7 states in January 2024. Partner capacities are limited mainly linked to constraints in funding but also a broader challenge in access and evolving security context in areas of response. With the evolving context including the establishment of a Sudan Operation Coordination Centre (SOCC) in response to risks of famine and the growing outreach/ coverage by site management partners, the Cluster

Reporting – Template

Reporting Month	May
Agency Name	
Focal Person	
State of coverage (e.g., Gedaref, Sennar etc)	For example: White Nile state
Total number of sites your agency is covering. (Name the locality and breakdown in sites if possible)	For example: Total sites covered: 50 in the White Nile state: (Breakdown: 25 in Rabak locality and 25 in Kosti locality)
Number of people reached with your agency site management interventions (please capture households/ total individuals) (Site management services include but not limited to site/locality level coordination, community engagement activities, site planning, site improvements, service mapping, multi-sector assessments, referrals, multi-purpose cash assistance etc)	For example: 100 households / 1,500 individuals

Key achievements updates- Summary Points

A.O.B

- Request updating the PSEA Network contact list- 10 July
- CCPM results-Next meeting
- Capacity-development-TF Meeting
