- UN : UNHABITAT, UNDP

First Six Months: Key Achievements

Coordination & Information Management

- Partners have conducted **720 site assessments** in sites outlining demographics, multi-sectoral assistance, and priority needs for over 1 million displaced people.
- People on the move: SMWG partners have supported with **data and referrals for people following evacuation orders**.
- SMWG maintains a site master list - providing partners across clusters with a **comprehensive overview of 2,465 site locations** throughout the Gaza strip. Partners have used this data for life-saving assistance delivery including the polio campaign, health facility gap-filing, and winterization support.

Community mobilization & participation & two-way communication with site residents

- Partners ensure community participation in site-level decision making and leadership with **support to diverse committees in 28 sites**. This includes 107 individuals in committees.
- Neighborhood based approach: SMWG partners are piloting this site management strategy to ensure that displaced people in sites and their neighbors in **four neighborhoods covering 171 sites** work together to inform service delivery and prioritization.

Site improvements & maintenance

- To prepare for the winter, SMWG partners conducted **rapid flood assessments in 101 sites hosting 450,720 displaced people**. This includes 56,32 individuals (32,449 children) living in 73 sites on the coast in 6,813 makeshift shelters. In 97 sites, committees are in place and ready to start winterization preparedness.
- Partners are already supporting committees on winterization in **35 sites**.

Protection mainstreaming

- Partners have conducted **community-led safety audits in 7 sites covering 104 individuals**. With limited access to materials, goods, and services, partners will support communities in designing and implementing solutions to safety and protection concerns at site level.

Disclaimer: The information presented herein is based on submissions from our partners and situation in Gaza may change rapidly. For any questions, please contact the coordinator, Kerry McBroom <k.mcbrroom@unrwa.org>, from Site Management Working Group.
