

**Overview**

The Cluster's site assessment tool identifies population demographics, multi-sectoral gaps, and needs at the site level to inform planning and response. In August, assessments were conducted in 677 sites across 9 states, including White Nile, Gedaref, Northern, Red Sea, River Nile, Khartoum, South Darfur, Central Darfur, and West Kordofan. The goal is to scale up these assessments to more IDP hosting locations, subject to access and resource capacities. According to IOM DTM Mobility Update (July), there are 10.7 million internally displaced persons in Sudan, with 44% living in camps, collective centers, and informal settlements.

Total sites mapped as of August	677
Total beneficiaries reached overall response plan	489K
Total beneficiaries reached through famine response plan	327K

**Population Demographics**

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations. Abyei region: Final status of the Abyei area is not yet determined.

**Site Details**

Site/ Location type	79% Urban
Site typology	86% Collective centre (in a public space or public building)
Who manage the site	55% Community
Shelter category	61% Primary schools
Availability of services from humanitarian actors	86% Yes

The depiction and use of boundaries, geographic names and related data shown on maps and included in lists, tables, documents, and databases are not warranted to be error free nor do they necessarily imply official endorsement or acceptance by the United Nations. Final status of the Abyei area is not yet determined.

## Site Management

Local authorities present		60% Yes
Active site-level community governance structures		73% Yes
Who is part of this site management committee?		53% IDPs and other community representatives
Main channel for CFM		37% Through the site management committees
Fire prevention mechanism		94% No
Have sites reached full		77% Yes
Sites have functional street-		65% No

### Overall observation of the site conditions

## NFI Shelter & NFI

Living in permanent structures (Schools, Government buildings)		79%
Overcrowded sites		71%
IDPs are living in open areas without shelter		39%
Non-related families are sharing houses		69%
Shelters need repair in the sites		57%
Households have received NFI in the last 3 months		53%
Households have never received any shelter kits		44%

### Overall shelter & NFI conditions

## Protection risks

Any incidents affected women		8% Yes
Protection structures in the sites?		55% No
Property looting incidents		23% Yes
Are there children without caretaker?		8% Yes
The relations between MOST IDPs and the local community		68% Good
Persons unable to access services because they fear for their safety		16% Yes
Persons move freely in the sites with safety		23% No
