## CCCM Cluster Monthly Situation Report

JANUARY 2025

The CCCM Cluster held a two-day strategic workshop on January 30th and 31st, 2025, with 40 participants from the Relief and Rehabilitation Commission, CCCM partners, and State focal points. The discussions focused on contextualizing the 2025-2029 Global Cluster Strategy to South Sudan, emphasizing key areas such as Alternatives to Camps, Solutions from the Start, Community Engagement, Local Leadership, Informed Responses, Working across sectors, adapting to climate change, and ensuring safe and dignified environments. For more details, please [click the link](#) to the summary notes on the discussions.

## GREATER EQUATORIA (CENTRAL, EASTERN, AND WESTERN EQUATORIA)

**General Situation:** In January 2025, Greater Equatoria experienced significant displacement due to the fear of armed Bor cattle herders. Approximately 7,000 individuals were displaced from Nyollo and Ayii Bomas of Agoro Payam. The displaced individuals moved to various locations, including Magwi town, Lobure Boma, and even crossing into Uganda and Nimule.

### Key Updates:

- **Displacement and Response:** The DRC mobile team and partners like Rescue Mission and NRC conducted multi-response activities in four IDP sites (Nakofo, Nambia, Manzinzi, and Regina Mundi) in Ezo Payam of Ezo County. These activities were in response to the Tombura conflict, which displaced many individuals from October 2024 to January 2025.
- **Registration for Assistance:** The DRC registered 1,500 IDP households for Multi-Purpose Cash Assistance (MPCA) in Regina Mundi, while NRC registered IDPs in Nakofo, Manzinzi, and Nambia for MPCA.
- **Health and Sanitation:** MSF expressed the need to close sites in IDP 3 due to declining cases, and S/NFIs and WASH activities were conducted by TERM. Open defecation remains a significant risk factor in camps 1 and 3.

## UPPER NILE STATE

**General Situation:** The security situation in Upper Nile State remained calm across all CCCM operation sites, with no major incidents reported. However, additional police officers were deployed in Bulukat Transit Center due to tensions in Sudan targeting South Sudanese refugees.

### Key Updates:

- **Site Coordination and Health:** Two site coordination meetings were held to address cholera cases, with discussions on upgrading temporary shelters for vulnerable refugees and returnees. Outreach teams disseminated messages on cholera prevention and humanitarian services.
- **Care and Maintenance:** Activities included clearing grass, desilting drainage channels, road grading, and water pumping operations to mitigate flooding and erosion risks.
- **Community Engagement:** Mass cleaning campaigns and profiling of refugee households for relocation were conducted. Community complaints related to health, protection, NFIs, and food were recorded and addressed.

## WBEG, NBG, WARRAP, AND ABYEI

### Key Updates:

- **Consultation Meetings:** IOM CCCM coordinated consultation meetings on plots allotment, WASH, HLP, and shelter-related issues in Khor Malang reintegration site. The community agreed to start water projects and other activities.
- **Complaints and Feedback:** Two individual complaints regarding missing names in the reintegration process were recorded.
- **Community Awareness:** Awareness campaigns on shelter maintenance and hygiene were conducted using megaphones, targeting the population in Naivasha and Hai Masna IDP sites.

## JONGLEI STATE AND GPAA

### Key Updates:

- **Flood Effects:** Chuil Payam, located on the western bank of the Sobat River, struggled with the effects of flooding, displacing 480 individuals. Rehabilitation of drainages in Bor IDPs camp was initiated to manage floodwater.
- **Community Needs:** An interagency assessment was recommended for Chuil Payam due to the alarming devastation by floods. Urgent assistance needed includes NFIs and fishing gears to improve livelihoods.

## UNITY STATE

### Key Updates:

- **Field Missions and Assessments:** A joint field mission assessed the situation of returnees and flood-displaced persons. Sensitization sessions on cholera prevention and fire safety were conducted.
- **Cleaning Campaigns:** General cleaning campaigns and drainage cleaning were coordinated to combat the cholera outbreak.
- **Infrastructure Improvements:** Rehabilitation of roads, dyke repairs, and drainage system cleaning were carried out to improve site conditions.
- **Community Engagement:** Focus Group Discussions on durable solutions were held, and new arrivals were registered and assisted.
